

World Environment Day

The World Environment Day is celebrated every year worldwide on the 5th of June in order to raise global awareness about the environmental issues. On this day, people from all over the world would do something positive to help our planet.

With full enthusiasm our tiny stars from the Nursery entertained us with an amazing dance performance on how to ' Save the birds '. It was an eye opener to all of us.

This was followed by a speech by Meghana R of Std IX. She spoke on how we should save ' Mother Earth ' so that our future generations can live in a safe and clean environment.

A young sapling was presented by Simony S of Std VI to our Principal Bro. Titus Anto.

Finally, the students of Class VIII & IX entertained us through an informative dance performance on how important it is for us to ' Save trees ' because trees play a major role in our planet and we cannot live without them.

The condition of our environment is declining day by day because of the pollution and global warming. We should celebrate and promote eco - friendly developments in our country in order to save the environment for a better future.
